

4-Blades Slit <GHM-7>

The slit is installed in a XAFS instrument.

Features

- ◆ Automatic 4 blades slit.
- ◆ One motor gives a slit width
- ◆ One another motor allows to scan with the slit width keeping.
- ◆ Easy recognition for the position by visible scale on the cover.
- ◆ The Blade's parallelism and orthogonality are precisely adjusted by a Kohzu's technician for each by each.
- ◆ The blade is made of Tantalum and precisely polished.

Specifications

Model	GHM-7
Aperture Size	Maximum 10mm x 10mm
Scan Stroke	± 5 mm
Resolution (Half-step)	0.5 μ m/ step (Each Blade)
Blade Material	Tantalum 5mm t
Blade Parallelism	10 μ m
Blade material	Tantalum 5mm t
Dimension	280 x 280 x 74 mm ³
